

## ***-August 2020-***

The Technology Education of Illinois will hold its 27<sup>th</sup> Annual, but first ever “**Virtual**” Illinois Technology Education Conference (ITEC) on November 6<sup>th</sup>. Because of the restrictions on groups gathering, there will not be an in-person conference this year. For the Virtual conference, registered attendees will receive a passcode to access to the ITEC web portal, giving them access to multiple recorded and live breakout sessions, a mailed conference “Content Box”, as well as full access to all online conference resources and content.

### **Exhibitor Exposure**

To make sure that your sponsorship dollars are maximized, for the 2020 “Virtual” conference, all exhibitors will have their company/organization logo featured on the right-hand side of **ALL conference webpages**, including their own unique conference webpage. In addition, one flyer/brochure/or similar item can be included with the conference content box that will be mailed to all registered attendees. Exhibitors can also submit a breakout session at no additional cost. We are offering exhibitor spaces for as low as only \$200.

Our association would like to express its thanks to the vendors/exhibitors that have supported our organization and our Illinois teachers in the past. If you have any questions or would like additional information, please feel free to contact me via e-mail at [wmerchantz@hf233.org](mailto:wmerchantz@hf233.org)

Professionally,

A handwritten signature in black ink, appearing to read 'William Merchantz', with a long horizontal flourish extending to the right.
